4)Q & A

5)Error may have (running Code Editor)

1) Running a basic C Program

- IDE (Code Blocks)

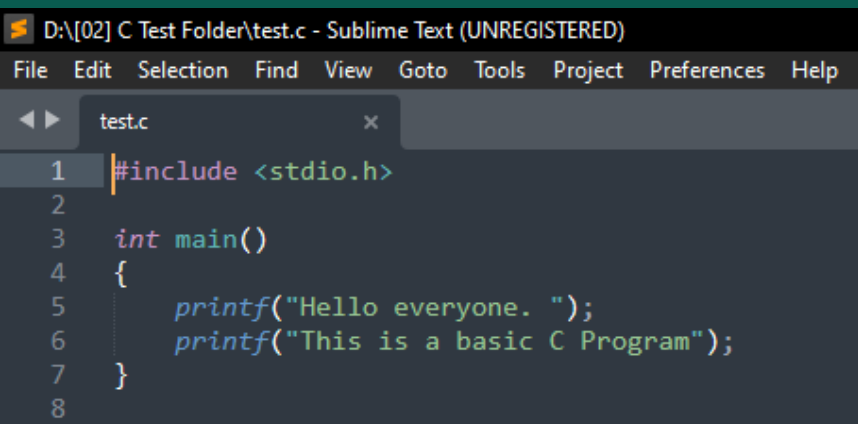

```
1  #include <stdio.h>
2
3  int main()
4  {
5      printf("Hello everyone. ");
6      printf("This is a basic C Program");
7  }
8
```

D:\test.exe

Hello everyone. This is a basic C Program
Process returned 0 (0x0) execution time : 0.014 s
Press any key to continue.

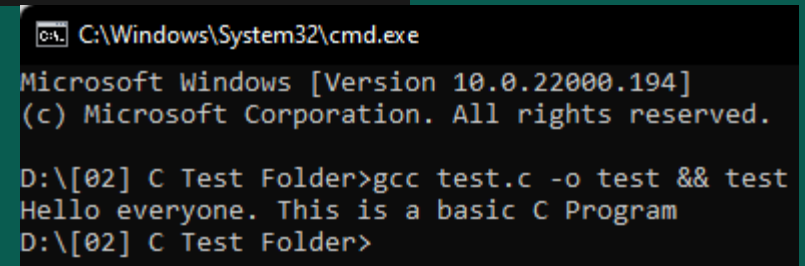

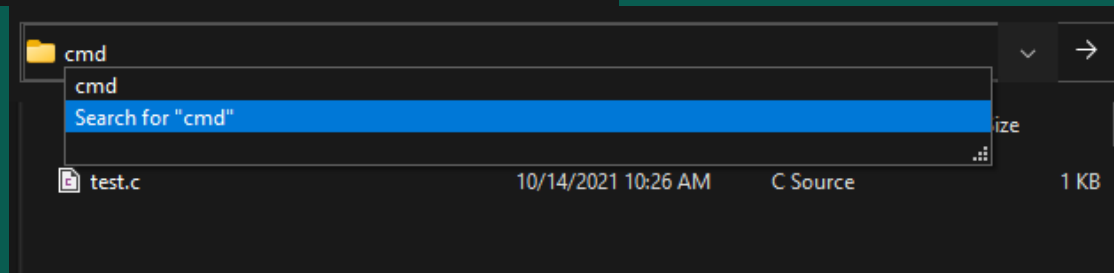

1) Running a basic C Program

- Code Editor (Sublime Text)

The screenshot shows the Sublime Text editor window titled "D:\[02] C Test Folder\test.c - Sublime Text (UNREGISTERED)". The menu bar includes File, Edit, Selection, Find, View, Goto, Tools, Project, Preferences, and Help. The file "test.c" is open, and the code is as follows:

```
1 #include <stdio.h>
2
3 int main()
4 {
5     printf("Hello everyone. ");
6     printf("This is a basic C Program");
7 }
8
```

The screenshot shows a Windows Command Prompt window titled "C:\Windows\System32\cmd.exe". The output of the command is as follows:

```
Microsoft Windows [Version 10.0.22000.194]
(c) Microsoft Corporation. All rights reserved.

D:\[02] C Test Folder>gcc test.c -o test && test
Hello everyone. This is a basic C Program
D:\[02] C Test Folder>
```

2) Bonus (Code Formatter)

```
1      #include <stdio.h>
2
3      int main()
4      {
5          printf("Hello everyone. ");
6              printf("This is a basic C Program");
7              for (int i; i < 5; i++){printf("%d ", i);}
8      }
```

C programming examples, exercises and solutions for beginners

Basic C programs

- Hello world program in C
- Basic input/output
- Basic IO on all data types
- Perform arithmetic operations
- Find area and perimeter of rectangle
- Find diameter and area of circle
- Find area of triangle
- Find angles of triangle
- Temperature conversion
- Length conversion
- Days conversion
- Find power of a number
- Find square root
- Calculate simple interest
- Calculate compound interest
- Find range of data types
- [View all programs →](#)

Bitwise Operator

- [Check Least Significant Bit \(LSB\)](#)
- [Check Most Significant Bit \(MSB\)](#)
- [Get nth bit of a number](#)
- [Set nth bit of a number](#)
- [Clear nth bit of a number](#)
- [Toggle nth bit of a number](#)
- [Highest set bit of a number](#)
- [Lowest set bit of a number](#)
- [Count trailing zeros of binary number](#)
- [Count leading zeros of binary number](#)
- [Flip bits of a number](#)
- [Rotate bits of a number](#)
- [Decimal to binary](#)
- [Swap two numbers](#)
- [Check even or odd](#)
- [View all Bitwise operator examples →](#)

Conditional operator

- [Maximum of two numbers](#)
- [Maximum of three numbers](#)
- [Check even or odd](#)
- [Check leap year](#)
- [Check alphabet](#)
- [View all Conditional operator examples →](#)

If...else

- [Find maximum of two numbers](#)
- [Find maximum of three numbers](#)
- [Check negative, positive or zero](#)
- [Check divisibility](#)
- [Check even or odd](#)
- [Check leap year](#)
- [Check alphabet character](#)

Switch...case

- [Print day of week](#)
- [Find total days in month](#)
- [Check vowel or consonant](#)
- [Find maximum of two numbers](#)
- [Check positive, negative or zero](#)
- [Find roots of quadratic equation](#)
- [Simple calculator application](#)

For, while, do...while loop

- [Print natural numbers from 1 to n](#)
- [Print alphabets from a to z](#)
- [Print even numbers from 1 to n](#)
- [Print sum of all numbers from 1 to n](#)
- [Print sum of all odd numbers from 1 to n](#)
- [Print multiplication table of n](#)
- [Find number of digits in a number](#)
